# *Letter of Introduction*

---

2m Solutions, Inc., welcomes this opportunity to present our Capabilities Statement to potential partners and customers. Our approach to every transaction has always been to achieve excellence of the highest quality in terms of deliverables and performance. From the very inception, we have answered the call to exceed our customer's expectations. Here at 2M Solutions, we have the expertise and resources to ensure that the products we sell meet the needs of our clients in functionality, efficiency and quality assurance. In addition, we advise on the design and implementation of our client's security needs. Through synergistic partnerships we are capable of providing greater capacity in human and financial resources and limit risk exposures. 2m Solutions, Inc. will deliver single source solutions with a strong assurance of timely performance and high quality workmanship. We look forward to a favorable review of 2m Solutions, Inc. Capabilities Statement and ask that you please contact us if you have additional questions.

Sincerely,

---

Mouaz Al-Lababidi, CEO

# *Company Overview*

---

2mcctv has come a long way, since we first began in 2004. With each new day that passes, we are making progress updating our system and our operations to ensure that you, our customer, receive the best service possible. It is a known fact that video surveillance has become commonplace in today's society. We've all seen the videos on TV of stores being robbed, internally or externally. While video cameras do offer a deterrent to crime they also aid in prosecution. Sadly, theft doesn't come only from outsiders but from insiders as well.

In fact, theft by employees is six times greater than that of shoplifters. Surveillance, however, is no longer just about catching “the bad guy,” it is also an extension of management, allowing a business owner to be in more than one place at a given time, to provide an extra pair of eyes, so to speak. Video cameras allow business owners to watch employees, monitor a production process or track product movements, all from a remote location. The cost of a surveillance system is easily offset by the savings you could incur from reduction through shrinkage (loss from theft, breakage, employee error, etc), not to mention travel time and transportation costs if you have more than one business site. Adding cameras can reduce the cost of doing business and has been proven many times over.

Here at 2M Solutions, Inc. we are increasing our number of employees, so we can stay on top of things and keep operations running smooth and easy. We are blessed with a very diverse group of individuals, and although we may speak in different tongues and come from different places we are all one family with one goal in mind; helping you, our valued customers. We appreciate the opportunity to earn your business and hope you will consider being our clients for many years to come. Thank you, from everyone here at 2M Solutions, Inc.
